Personal Projects

1. Covid-19 Report Generator:

Software & Tools - UiPath | Excel Automation | Data Scraping | Gmail Automation

[GitHub Link](#)

After scraping real-time data from Google's Covid-19 report website, the project curates an excel sheet with the said data and send an email to the Gmail inbox of the user.

2. BMI Calculator:

Software & Tools - UiPath | Excel Automation | Data Scraping

[GitHub Link](#)

This project reads user's height and weight from orchestrator and provides BMI result by scraping data from the browser.

3. Product Sentiment Analysis:

Software & Tools - UiPath | Excel Automation | Document Understanding (under UiPath AI Center)

Using Sentiment Analysis package under Document Understanding module of UiPath's AI Center, this project finds out the sentiment rating of the customer who bought a product from Flipkart. The result is generated in an excel sheet.
